

Bruxelles twin bombs

by Tania Daniels

On March 22th 2016, shortly before 8.00 o'clock in the morning, two suicide bombers have attacked Bruxelles airport Zaventem by blowing themselves up close to a check in gate. Around 90 minutes later, a third bomber fired his explosive belt in a second attack in the main subway line, close to the station of the European Parliament. The Islamic terror group Isis claimed responsibility for both attacks.

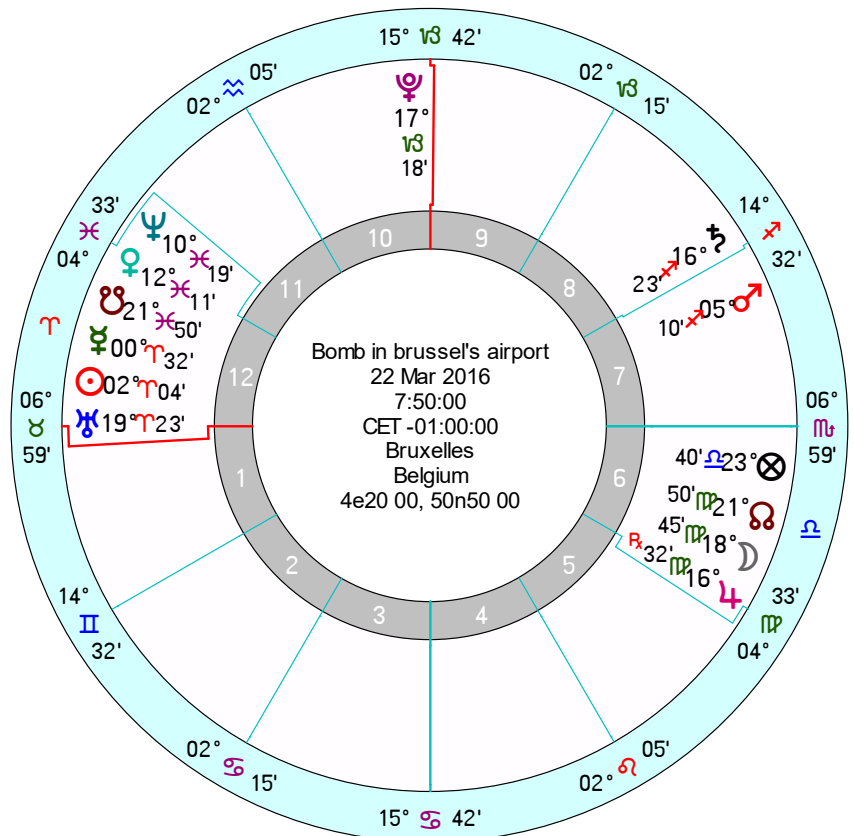

The chart shown right is cast for the aproximative time of the first detonation in Zaventem airport.

Taurus is rising in this daychart and Venus is exalted in the 12th house. This Planet describes the suicide bombers.¹ Isis, (which is the Transliteration of the Arabic word for "Islamic State") was one the many manifestations of Venus, similar to Inana, Ishtar, Astarte and many more. She is in a bicorporal sign, which describes "more than one person". In fact, there were two suicide bombers in the airport: *Najim Laachraoui* and *Ibrahim El Barkaoui*.

Venus is in Pisces in the 12th house, which, I think, describes accurately the "crowd" of people, where the bombers decided to act.

Venus first applies to Saturn, ruler of the 10th, which we can associate here with the check-in gate. As the terrorists could not enter in the "inner circle" of the airport without passing the x ray controls, the most "elavated" place was that check in. This was the place, were the men would fire their bombs hidden in the suitcases.

Venus then applies to an opposition with her dispositor Jupiter, heavily afflicted by retrogradation, detritment and placement in the 6th house. Jupiter rules the 12th house of hidden enemies. In this chart we can be more precise and define it as the house of "(sleeping) terror cells". This is already striking, but Jupiter

¹ The AC describes the part that "takes action". In horary astrology it also describes completely unknown persons or groups to the querent, see William Lilly, *Christian Astrology*, p. 151.

also rules the 8th house of death and is the exaltation ruler of the 4th, which is defined as “grave” or end of things.

In other words, the suicide bombers (Venus) were ordered by Jupiter (Isis) to cause death (8th house) and terror (12th house). No wonder, we find Pluto (destruction, terror, panic) on the MC cusp, sextile Venus.

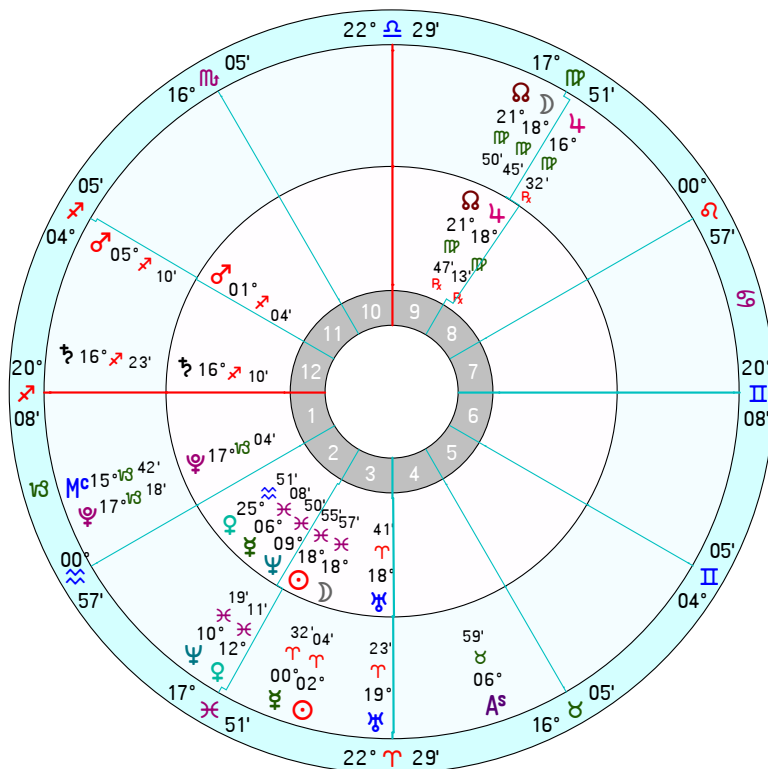

If the AC and Venus describe the bombers, their victims are necessarily symbolized by the opposite house, the DC and its ruler Mars. Mars is in Sagittarius, which describes the upper legs, thighs and knees. The legs are precisely that part of the body, where the survivors were mainly injured when the bombs exploded on the floor. Mars is out of sect and thus the main malefic. Mars is received by domicile by Jupiter, the ruler of the 8th. This reception, together with the trine to the Sun is probably the reason that the final balance of lost lives is not much higher.

The Moon is separating from Jupiter. We know that the two men planned to carry other two suitcases full of explosive material, but the taxidriver, who picked them up at home, did not allow them to put so many luggages in his small car and they discussed about this for a while. That driver, without knowing, prevented a much bigger disaster, originally planned. This is why I tend to assign the taxidriver to the major benefic. He was not able to avoid what happened only few minutes later (Jupiter afflicted) and he literally “drove” the death to the airport (ruler 8th house), even without any intention. However, without him, two more suitcases of explosive material more would have caused many more deaths.

The fixed stars underline what is already said above: Moon's NN is conjunct Danebola (misfortune, calamities), AC conjunct Hamal (danger, accident) MC conjunct Manubrium (explosions), Mercury conjunct Scheat (diasters).

Comparing the airport chart to the horoscope of the only Sun eclipse of this year,² some kind of pattern seems to arise. Both charts are intimately connected. The inner wheel shows the eclipse, calculated for Bruxelles; the outer wheel shows the event chart of the airport bombing.

The ruler of the eclipse is Jupiter (Sagittarius rising). He is sitting right on the 9th house cusp, which describes travel and places/utilities linked to travel, such as airports or trains.

² March 9th 2016 1.57 a.m GMT

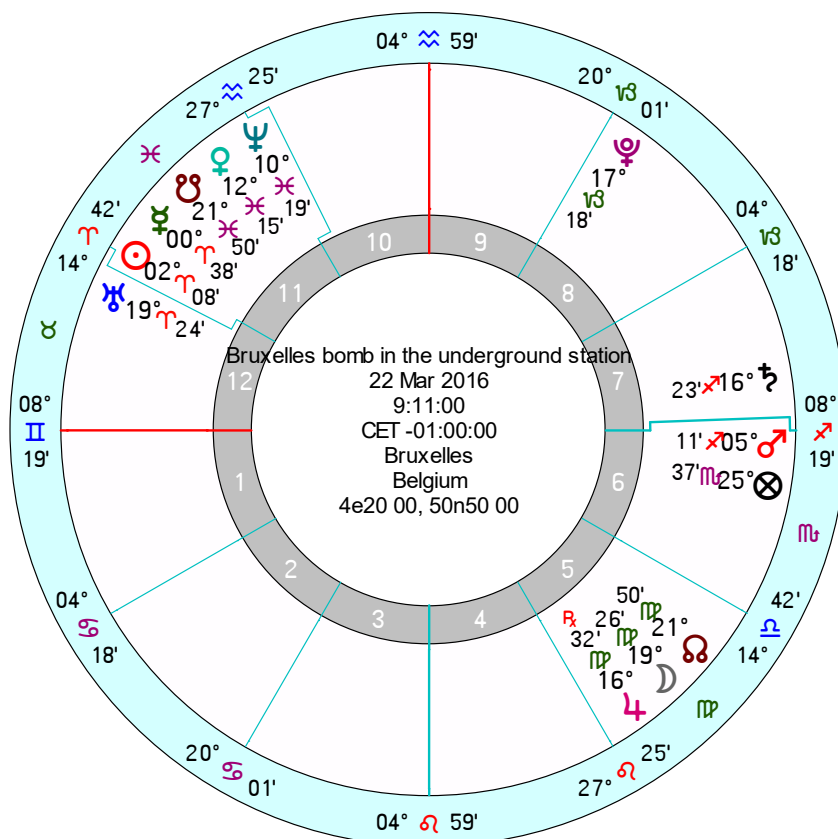

In the event chart, Jupiter describes the 8th house, death. Therefore, death comes from travel. The Moon of the event chart is exactly opposite to its own position of the eclipse and conjunct that Jupiter in the 9th house. The Moon acts here as a watch hand: the eclipse indicates places of travel and when the transiting Moon enters this house, while being in strong aspect to her own position in the eclipse, events start to unspool.

Let's now have a look on the second bomb attack, at 9.11 a.m. of the same day. The bomb exploded inside a wagon of the subway, not surprising to see Gemini rising.³

Gemini is a bicorporal sign, but its ruler Mercury is in Aries, indicating a sole person, Khalid El Bakraoui, brother of the other suicide bomber of the airport attack.

Mercury is in a fire sign, which describes metal, or engines which is appropriate for a wagon.

Mercury has just left his sign of fall (Pisces) and is now ruled by Mars, the ruler of the 12th (hidden terror cells) and exaltation ruler of the 8th (death). The planet (bomber) is going into combustion, which is to be taken literally.

Jupiter rules the 7th house of the victims and squares Saturn, ruler the 8th house, who he receives. In other words the victims "receive death", which makes the number of victims so high here: this reception is the contrary of the reception of the airport bombing: while in the airport chart the 8th house ruler (death) receives the 7th ruler (victims), that reception guaranteed a small chance for the people who happened to be near the mortal suitcases. Reception is intended as some kind of (even small) protection or chance of survival: The inviting host has to be "friendly" to his guest. But in the subway chart, the victims do receive death, which describes the ABSENCE of protection.⁴

Mars angular on the DC describes the violence of the explosion, which caused even more deaths than in the airport. In addition, very sadly it also describes the destruction by explosion caused by nail bombs.

³ Gemini generally describes movement and all means of transportation.
